Paul Stroemer - Manager of Scientific and Medical Communications - ReNeuron Ltd

Paul Stroemer completed his Ph.D. at the University of Texas Medical Branch in Galveston in 1994, developing pharmacotherapies in the promotion of behavioural recovery and anatomical plasticity after stroke. He then undertook post-doctoral research at the University of Manchester examining the neuroprotective effects of modulating inflammatory responses in the brain after stroke. Paul joined ReNeuron in September 1998 as a researcher developing surgical models and behavioural testing of stem cell therapies in central nervous system disorders and was appointed as the Head of Pre-Clinical Research in 2005. In 2012, he became CTX Programme Manager, coordinating development activity of ReNeuron’s lead cell line along with clinical trials in the limb ischaemia and chronic stroke (PISCES II). In 2016 Paul transitioned to a new role of Manager of Scientific and Medical Communications to become the company’s voice in promoting its clinical trials.
